Making a Pull Request:
- Contribute ← click
- Open pull request
  - base repository — the one you forked from (origin)
  - head repository — my repo
- Create pull request
  ⇒ type in msg.
- (Don't click 'close pull request')

× Choose merge not rebase)

✳ **Pull frequently** ～➤ reduces merge conflicts!

  + commit/push code frequently.

┌ Merge conflict ┐   ✱ edit files locally —
└ Resolution   ┘   ✱ Run Test — pytest
                     ✱ Add Files —
                     ✱ Commit —
                     ✱ Push —

:se pytest to Run tests anytime local code Δs.

  Collaborators: start at repo
